GERALDTON MARITIME SERVICES NETWORK

Geraldton lies at the heart of a region with a diverse economy and many opportunities for agriculture, aquaculture, mining, tourism, manufacturing and infrastructure opportunities. Centrally located between Perth and Broome, in Western Australia, Geraldton sits outside the cyclone zone of the North West. Geraldton and its industries have the potential to be a home for projects that build on existing strengths, as well as new and innovative enterprises.

With strong infrastructure and linkages to the Asia Pacific region, our clean and green reputation for efficiency and productivity ensures our produce and resources are highly sought after.

Greater Geraldton contains a range of engineering and manufacturing enterprises involved in marine infrastructure production, prefabricated metal products and sheet metal products for a variety of export and domestic construction customers.

Businesses engaged in marine services can access high quality infrastructure at the fishing boat harbour, including 50- and 200-tonne boat lifting and hard-stand facilities.

What's more, all businesses benefit from the city's skilled, specialised workforce, low input costs and proximity to industrial sites and communities to develop high margin niche markets.

Geraldton's maritime industry has demonstrated that it has the potential to be a world leader. Comprising of large and small companies, the maritime industry makes a great contribution to this region's economy and unique lifestyle.

These companies provide employment and develop new market opportunities across many sectors.

Geraldton's maritime industry boasts companies that have been underpinned by the highly adaptive and skilled Geraldton workforce with the emerging services sector a vital part of the industry.

Businesses in the supply chain have successfully diversified their markets in other sectors. These companies will continue to operate in the highly competitive international markets where major opportunities exist. Sustaining world-class capability and a competitive advantage will be a major challenge for the maritime industry.

The Geraldton Maritime Network comprises the heart of the maritime industry. With their ability to adapt to changing market conditions and to keep abreast with customer needs, together with Geraldton's enviable reputation for quality and excellence, I am proud to commend the products and services detailed in this brochure to you.

Mayor Shane Van Styn
City of Greater Geraldton

Mid West Ports Authority (MWPA) is a WA Government Trading Enterprise which operates two harbours in Geraldton where a variety of opportunities exist for businesses servicing the marine industry.

Key features of these facilities are as follows;

Commercial Harbour:

- Deep water port and channel;
- Comprising 6 berths ranging from 190 metres to 235 metres in length;
- Declared depths alongside range from 8.6 metres to 12.7 metres (at zero tide);
- Two berths well suited to receiving general cargo;
- Multiple licenced stevedores;
- Berths are worked on a 24/7 basis; and
- Laydown areas available (2 x approx. 15,000 m²) adjacent to commercial harbour.
- In addition, there is approximately 35,000 m² of land adjacent to the FBH which is available for development.

Fishing Boat Harbour (FBH):

- Declared depth at the harbour entrance of 3.8 metres (at zero tide);
- The FBH consists of:
 - 400+ metres of wharf for loading/unloading vessels;
 - 150 pens able to accommodate vessels up to 24 metres in length;
 - 2 x boat lifters (50 tonnes and 80 tonnes);
 - Vessel paint and blast facilities;
 - 2 x vessel hard stands (20,000 m² and 12,400 m²)
- ; and
- Diesel refuelling facilities.

MWPA is recognised as a leader in innovation, port service efficiency and employee, customer and community engagement.

MWPA actively pursues trade to foster regional prosperity.

FINE ENTRY MARINE

In 22 years of operation Fine Entry Marine has constructed 29 vessels for clients from around Australia and overseas in the Oil & Gas, Charter, Fishing industries and Government agencies such as the Fremantle Port Authority and the Department of Police and Emergency Management. Our vessels are built tough, have proven track records in strength and reliability and they maintain their value.

Along with building new vessels, the last few years have seen us busy refitting many ex-crab fishing vessels for the oil and gas industry and are now seeing a trend to convert them back to fishing again. This involves extensions, engineering, modifications, insulation, sullage systems, awnings, electrical, electronics and painting.

We work closely with AMSA Surveyors to achieve a high standard of survey. Our factory is situated on a 3,000 square meter waterfront property and boasts a 40m x 30m construction hall that is professionally equipped to construct up to 30 to 40 metre vessels or a number of smaller vessels simultaneously.

With direct access to lift 200-tonne vessels with a maximum beam of 10.2 metres, vessels only take 10 minutes to launch from our facility to the water.

In addition to our 3,000 square meter property we make use of the adjoining 12,000 square meter hardstand, large paint spray facility and wash-down area of the Geraldton Boat Lifters.

Our construction, refit and repair facility are located at Fisherman's Wharf, Geraldton.

Geraldton Maritime Network

Central Regional TAFE - Batavia Coast Maritime Institute

The Batavia Coast Maritime Institute (BCMI) campus is a state of the art training, research and development facility located on the oceanfront of the picturesque Separation Point in Geraldton.

BCMI has positioned itself as a world class centre of excellence, specialising in the areas of aquaculture, marine and environmental science research and training.

Our wide range of partnerships and collaborations with industry allows the integration of industry, research and education throughout a broad range of fields, attracting students both locally and internationally. Students at BCMI have the unique advantage of learning and developing skills within a commercially operational environment, providing them with a realistic and hands-on training experience.

Advantages of studying with us include:

- Strong focus on field based training including regular trips to the Abrolhos islands aboard the Master Class
- Opportunity to gain experience working on a range of real world industry based projects and research
- Small class sizes allowing for personalised tuition and a cohesive learning environment
- Pathways to university
- VET-in-schools opportunities and work placements
- A range of industry relevant short courses. The BCMI offers nationally recognised qualifications from Certificate I up to Diploma level in aquaculture, laboratory science, conservation & land management, horticulture, tourism, marine and environmental science, as well as maritime qualifications.

Find out more about the BCMI by taking a FREE behind the scenes tour.

For more information and to make an enquiry call 1800 672 700 or email info@crtafe.wa.edu.au

XTREME MARINE AWARDED BEST LOBSTER BOAT BY AUSMARINE IN 2015, 2016 & 2017

BUILDERS OF HIGH QUALITY ALUMINIUM MARINE WATER CRAFT

Peter Ellis is the Managing Director of Xtreme Marine and has over 36 years of experience in the marine industry and together with his professional, dedicated and highly skilled team they have over 160 years' experience combined.

Renowned for their excellence in engineering and knowledge of custom built aluminium vessels from design stage through to launching, they have been delivering to customers from the fishing, charter and oil and gas industries all across Australia, specialising in commercial vessels, pleasure craft and high quality aluminium marine water craft ranging from 5m to 25m for over twenty years.

Offering a solid reputation for workmanship, reliability and after sales service that is of the highest standard, Xtreme Marine has been building and servicing vessels from their workshop, situated conveniently on the waterfront, boasting a large boatbuilding facility at Fishermen's Wharf in Geraldton, with over 2100 square metres of floor space.

Catering for multiple vessels at the same time with the added advantage of travel lift access into their large shed they have proudly developed some of the best tried and proven systems in the industry today.

Peter and his team are happy to work with you to construct a vessel totally suited to you and the conditions required and welcome your input from inception through to completion of construction.

Geraldton Marine Electronics Pty Ltd is a locally owned business which has been in operation for over 18 years. With a small crew of technicians, including apprentice technicians, we specialise in the latest technology in marine navigation and fish finder equipment.

We provide quality service to those in the Offshore Oil & Gas, Mining, Government sector and Fishing industry. Our mission is to provide quality Marine Electronics Service to the people of the Midwest and surrounding areas.

We are proud to announce that we have been awarded Furuno Australian Dealer of the Year in 2015, 2014 and 2013 and Furuno Western Australian Dealer of the Year for 2017, 2012, 2011, 2010 and 2009.

Placing 2nd in consecutive years of 2016 and 2017 for the ANZ Simrad Pro Dealer of the Year, makes Geraldton Marine Electronics an up and coming small business and reinforces the fact that our business is always striving for excellence in our field of expertise.

We have had the privilege of supplying and installing the electronics on the following new vessels this year: 24m cray boat for the Cockman family, 20m boat for the Ralph family, 24m cray boat for the Bass family and a 24m patrol boat for the Tasmanian Police.
